(54) MAGNETIC RECORDING AND REPRODUCING SYSTEM

(57)Abstract:

PURPOSE: To provide a magnetic recording and reproducing system which is easy to be used by facilitating insertion of a title and also by facilitating confirming an image after editing which includes insertion of a title.

CONSTITUTION: An operator specified in/out points and a title insertion point by a control panel 16 while reproducing a recorded tape. A microcomputer 15 controls a memory controller 23 to write a video signal corresponding to the amount of one field at a specified point in a memory 22. After scene is specified, the pictures of the specified in point, out point and the title insertion point are displayed on a monitor in the form of a divided screen. If an operator specified replacement of displaying sequence of displayed sections, it is automatically carried out, correspondingly. An input/output device 18

carries out reading/ writing in a storing media 17. A multiplexer 24 combines a video signal read out of the memory 22 with a title signal read out of a memory 20, and the result is outputted through a DA converter 25 and a switch 26. The switch 26 switches between the signal processed as above and an ordinal replayed video signal.
